- EuroISDN | Q.SIG | H.323 | T.38 | SIP

CAESAR Unified Messaging brings the telecommunication services voicemail, facsimile and SMS into your mail environment in an easy way. The CAESAR connector technology, which has been established in the market for years, provides for a professional and seamless integration into Novell GroupWise, MS Exchange, Lotus Notes, SAP, SMTP mail systems.

The integration of company address books and CRM solutions facilitates the simple addressing of outgoing messages.

The centralization of the whole communication traffic from telephone calls to facsimile, e-mail, SMS, voice in the user's mail client facilitates a chronological overview. Furthermore, the assignment of the Text to Speech technology permits the mobile access to all messages in the inbox, appointments and tasks via telephone.

So all the advantages of the voice and data integration are used optimal and "Unified Messaging" becomes reality.
